

# Bulk Seed Systems

Save your back – Save time – Keep your feet on the ground

1. Tired of chasing empty bags on windy days! Go BULK
2. Haul your seed from dealer to field.
3. **Easy Loading** - Place on outer edge then slide to center.
4. Switch to a different variety in **under 30 seconds**.
5. **Decreases fill time** to plant more acres in a day.
6. Haul enough seed for one day.
7. Each chute **hinges down** when not in use.

Figure 1: Filling Planter

Frame (Model 219D) (Patent Pending)

The Double Stand - Model 219D (Figure 2) holds two bulk seed boxes. Each frame comes with two chutes. A rolling bracket for mounting an air lock is optional. Single frames (Model 219S) are also available.

Figure 2: Double

Figure 3: Rolling Bracket with Q-bit Adapter and Air Lock

A close up of the rolling bracket with "Christianson" Q-bit adapter and air lock is shown in Figure 3. Other brackets are now available for different makes of bulk seed conveyors.

The Air Lock (Figure 4) is rolled from one box to the next on a rail that connects all the stands together. Each stand is mounted with eight bolts to the trailer while the bulk seed boxes are held in place by a lock-down lever. There is no need to strap down each box!
