

# ROCKVAC™

Its Not Just for Rocks!

*Originally designed for the fast, shovel-free removal of rock during landscape renovation projects, the RockVac is the world's most versatile industrial vacuum system.*

*In virtually any wet or dry application, the RockVac is capable of sucking rock, wood chips and shavings, sand, gravel, leaves, compost, mud, sludge, glass and debris.*

*The possibilities are endless!*

Manufactured by:  
Christianson Systems, Inc.  
20421 - 15th Street SE  
PO Box 138  
Blomkest, MN 56216 USA

## *The number of dry and wet applications for the RockVac is endless!*

With the suction power to move rock at distances of over 50' - and the blower protection system to handle the dustiest, dirtiest products - the RockVac meets the challenge of any application head-on.

*Vacuum rocks and mulch without shoveling!*

*By vacuuming instead of shoveling you can fill a 5 cubic foot wheelbarrow in less than 3 minutes!*

*It's not just for rocks. Use to vacuum dozens of materials such as Sand, Pea Rock, Mud, Sludge, Glass, Wood Chips, Garbage and Small Debris*

## Who Would Use the RockVac™?

Landscapers for removal of landscape rock or mulch  
City maintenance crews for sewer and curb cleanup  
Utility companies for shovel free excavation around fiber optic wires  
Roofing contractors for removal of rock prior to roof repair  
Golf courses for sand trap maintenance and renovation  
Highway maintenance crews for crack cleaning of either cement or asphalt roadways.

# ROCKVAC™

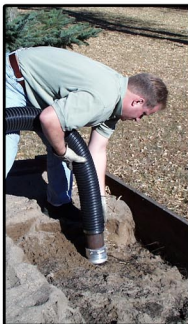

Its Not Just for Rocks!

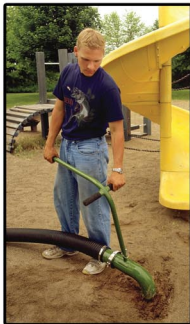

Fill an entire wheelbarrow with rock in less than 30 seconds!

## RockVac™ Applications:

- Sandblasting Sand or Grit Cleanup
- Golf Course Sand Trap Clean out
- Underground Rodent Removal
- Potholing / Footing Construction
- Stump Grinding Cleanup
- Flood Cleanup
- Salvage Work
- Rock Removal in Confined Areas
- Manhole Clean out
- Buried Utility Access
- Pit Clean out

# ROCKVAC™

Its Not Just for Rocks!

## LABOR SAVINGS!

Today, everyone in the landscape and construction industries agrees that finding employees to do hard, physical work is nearly impossible. The RockVac helps overcome this problem.

## REDUCE YOUR CREW SIZE!

Jobs that would normally take 5 to 6 crew members can now be done faster and cleaner with only 2 people and a RockVac!

## INCREASE REVENUES!

Without adding to your labor costs, you can increase the number of billable jobs your business handles.

## KEEP EMPLOYEES HEALTHY!

Reduce potentially costly employee injuries by eliminating repetitive strain.

## Options:

Gas, Diesel, or Electric Power  
Skid Mounted  
Vacuum/Pressure Combination

## IT'S NOT JUST FOR ROCKS!

Wood Chips and Shavings

Granite Rock

Leaves, Mulch and Compost

Sand

Landscape Rock

# FEATURES

[www.rockvac.com](http://www.rockvac.com)

## Towable Trailer

Solid, I-Beam steel chassis can be towed behind cars and small trucks. Repositioning on lawns and turf is easily done with ATVs or yard tractors.

## 24 HP Honda® Gas Engine

One of the work's highest quality engines provides maximum power and long service life.

## High-Performance PD Blower

Unbelievable suction power is created by the positive displacement blower to tack even the most grueling applications.

## Blower Protection System (Patent-Pending)

A commercial-duty filtration system virtually eliminates dust and debris from entering and damaging the blower - protecting your investment over time.

## Impact-Resistant Steel Holding Tank

Vacuumed product is contained in an impact-resistant, leak-proof steel holding tank, which is easily emptied via a bottom dump door into a wheelbarrow, skid loader bucket or trailer.

## Industrial-Grade Muffler

Reducing the noise emissions to less than 90 dB at 10 feet, the RockVac may be used in residential areas.

## Dual Inlet with Quick Couplers

For convenience and optimum performance, the rubber suction hose attaches easily and securely to either side of the holding tank.

## 15' Length of 4" HD Rubber Suction Hose

Industrial-grade hose accommodates several applications. Other hoses and accessories are also available.

Christianson Systems, Inc., makers of the Rock Vac, is a leading manufacturer of vacuum transfer equipment with over 40 years of industrial experience.

Christianson Systems, Inc., equipment serves the commercial bulk handling, agricultural, and marine port industries in both the domestic and international markets.
